## Bridal Tiara

### Materials:

- 1 x 115mm tiara base silver plated (TBSP)
- 1 x 0.4mmx20m silver plated wire (SPW04)
- 14 x 6mm Swarovski crystal, bicone (SWK5328-6-001UNC)
- 17 x 4mm round high quality glass pearls cream (GLVB0420)
- 8 x 6mm round high quality glass pearls cream (GLVB0620)

You will also need a pair of multi pliers (CRMT)

1. Cut approximately 12cm of wire, thread on a bead of your choice, bend the wire in half and gently twist the wire loosely together. Repeat to make 20 strands. Use a Swarovski crystal and a 4mm pearl on four strands and single beads for the others.
2. Start in the middle of the tiara band, wrap the ends of one strand tightly around the band Use the flat part of the pliers to flatten any sharp pieces of wire.
3. Repeat for all of your twisted wires, Work out from the centre keeping them close together. You can trim some of the wires to make a variety of lengths for the decorated section.
4. Cut 100cm of wire and, beginning at one end, wrap your wire neatly along the tiara band (cut more wire when necessary) until you reach the wire twists. Wrap around these too for extra security and neatness.
5. Add beads to the tiara band, one at the beginning of the wire twists, continue to cover the front of the wire twists with beads. Wire wrap the rest of the band. Use your flat nosed pliers to flatten out any sharp pieces of wire.
6. To finish the tiara bend the wire twists over slightly to give them a more three dimensional feel.
